

ABOUT ACTi

ACTi Corporation, founded in 2003, is an end-to-end IP video solution provider. Its development teams are dedicated to building customized solutions which fulfill specific project in both security and business management. The ACTi portfolio includes IP cameras, video management systems, video analytics, point-of-sale integration, access control integration, alarm system integration, queue management and other analytics based services.

The company is focused on creating market-driven solutions utilizing its broad array of products and services. These solutions can be tailored to match specific customer needs through a comprehensive pre- and post-sales global support.

ACTi UNIFIED SOLUTION

1. IP Cameras :

ACTi offers various types of cameras for all purposes with up to 12MP resolution, zoom and PTZ cameras with up to 36x optical zoom and extremely accurate auto focus, discreet and covert cameras and cameras with Extreme WDR and Superior Low Light Sensitivity technologies to capture clear image in environments with strong backlight and low light, respectively. Since 2016, ACTi started providing location-based cameras for customers' specific requirements.

2. Video Management System :

ACTi video management system is an advanced, reliable and scalable solution for video surveillance and business management.

(1) Standalone NVR: Plug-and-Play recorders that require minimum configuration and allow the fastest deployment. Available are 4-channel models to 200-channel models for various installation types and sizes.

(2) Software NVR: ACTi is offering its leading video management system – NVR 3 – in three editions. NVR Corporate is the most powerful edition that integrates many state-of-the-art features such as POS management, IP door control, network DIO, bookmarks, password protected playback and many more.

(3) Central Management System: ACTi CMS helps centrally manage NVRs and cameras in multiple locations. ACTi Mobile Client is a universal mobile application designed to remotely access NVR, CMS or camera for video playback and management from anywhere at any time.

SECURITY PLUS – VIDEO ANALYTICS

Most recorded video is never reviewed due to time constraints or lack of resources. As a result, security incidents are often missed and suspicious behavior is not detected in time to prevent incidents. To solve this problem, ACTi designed video analytics that help you transform your video surveillance network into a smart detection system and a valuable resource for business management.

Advanced image processing algorithms, such as, people counting or license plate recognition, can be used to recognize and track movement of people and objects to determine their behavior and provide analytical insights. The summary reports can then be displayed as interactive graphs and exported. The system can also trigger other network devices such as alarms, electric gates or digital boards.

Different solutions are recommended for distinct situations:

- (1) Dedicated analytics server – when analyzing a large number of channels, using sophisticated algorithms, or using NVRs without built-in analytics.
- (2) NVR with built-in analytics – when analyzing few channels or using a limited range of algorithms.
- (3) Intelligent cameras with built-in analytics – when analyzing single camera view or using VMS without built-in analytics (also supports third-party).

MARKET APPLICATION SUITE (MAS)

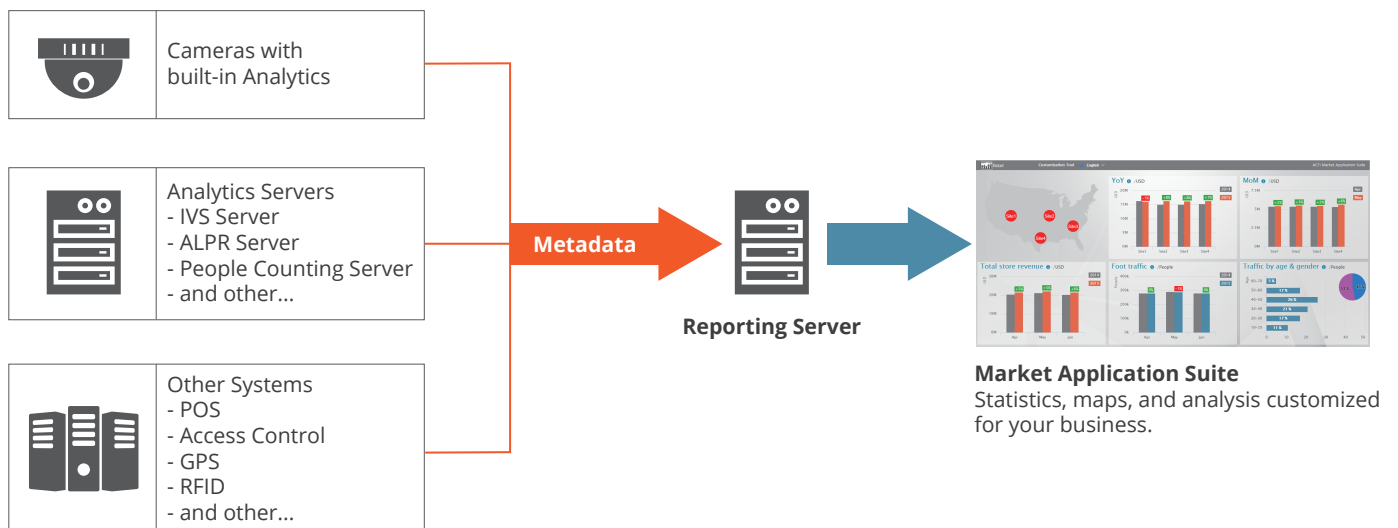

ACTi MAS is a solution to optimize business intelligence and operation management through comprehensive reports and real-time event handling. It can detect events and respond in real time. ACTi MAS also aggregates big data into dynamic and easy-to-understand insights. ACTi offers 2 types of MAS:

1. MAS for Operation Management :

Intelligent real-time management platform for work efficiency and quality assurance

2. MAS for Business Intelligence :

Intelligent cloud-based Big Data & reporting platform for business decision support

ACTi can offer you a complete solution – from IP cameras to efficient business management. ACTi can be your one-stop shop! If you are interested in ACTi solutions, please, contact sales@acti.com.
