

# Time Lapse

Feature of ACTi NVR 3

From version 3.0.17

# Introduction of Time Lapse

**Time Lapse** is a special method of video export where the video frames with pre-defined time interval are merged into the exported video clip.

With Time Lapse, it is possible to convert days or hours long video recordings into a few minute video clip for easier review.

**Example:**  
**5 hours video -> 5-minute video**

# Useful Applications of Time Lapse

Time lapse feature is suitable for the applications where the changes over time are relatively small compared to the background.

## **Parking lot**

Quick initial investigation based on the changes in the parking lot.

## **Utility**

Check any changes in the restricted territory of the utility sites, such as power plants.

# Useful Applications of Time Lapse

## Traffic

See how the traffic flow changes in different times of the day. Investigate traffic incidents.

## Construction Site

To monitor the progress of the construction.

# Time Lapse Supported Products

**Time Lapse is supported by ACTi NVR 3, starting from the version v3.0.17.**

Both standalone and software versions applicable.

Software editions of NVR 3

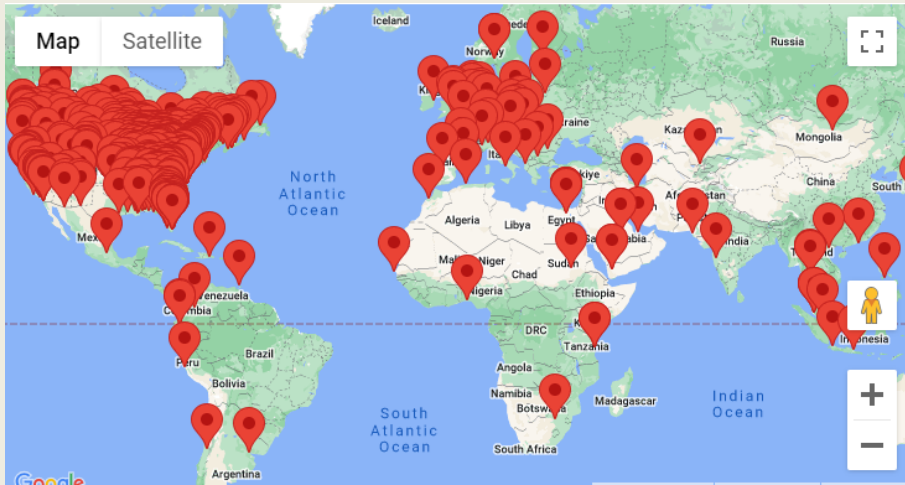

Standalone NVR options based on NVR 3.
