

Access Control Server

Overview

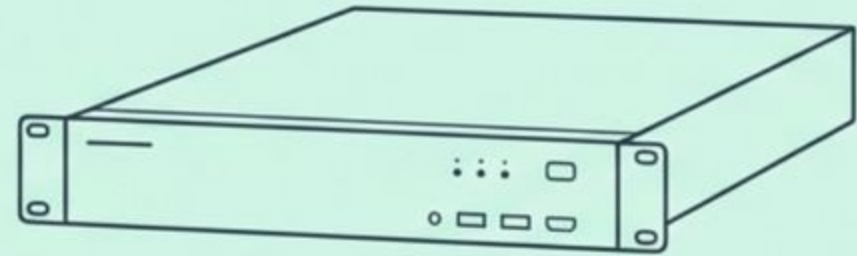

Comprehensive Central Management

Access Control Smart Server (ACSS) is a comprehensive software for managing employees, visitors, doors, and attendance.

Competitor Solution

- Requires 3rd Party PC
- High IT Overhead
- OS Security Risks

ACTi Standalone (ACS-100)

- Hardware + Software Included
- Single Vendor Solution
- Plug-and-Play Stability

Features

Video verification for access control

E-Map

Attendance management

Tailgating detection

Architectures

Edge Computing Stability

Door Station (Edge)

Performs Identification Locally
Roboto Regular

Server

Management Only
Roboto Regular

- **Reliability:** Eliminates risk of failure due to server overload or network instability.
- **Efficiency:** Does not consume server-side computing resources.

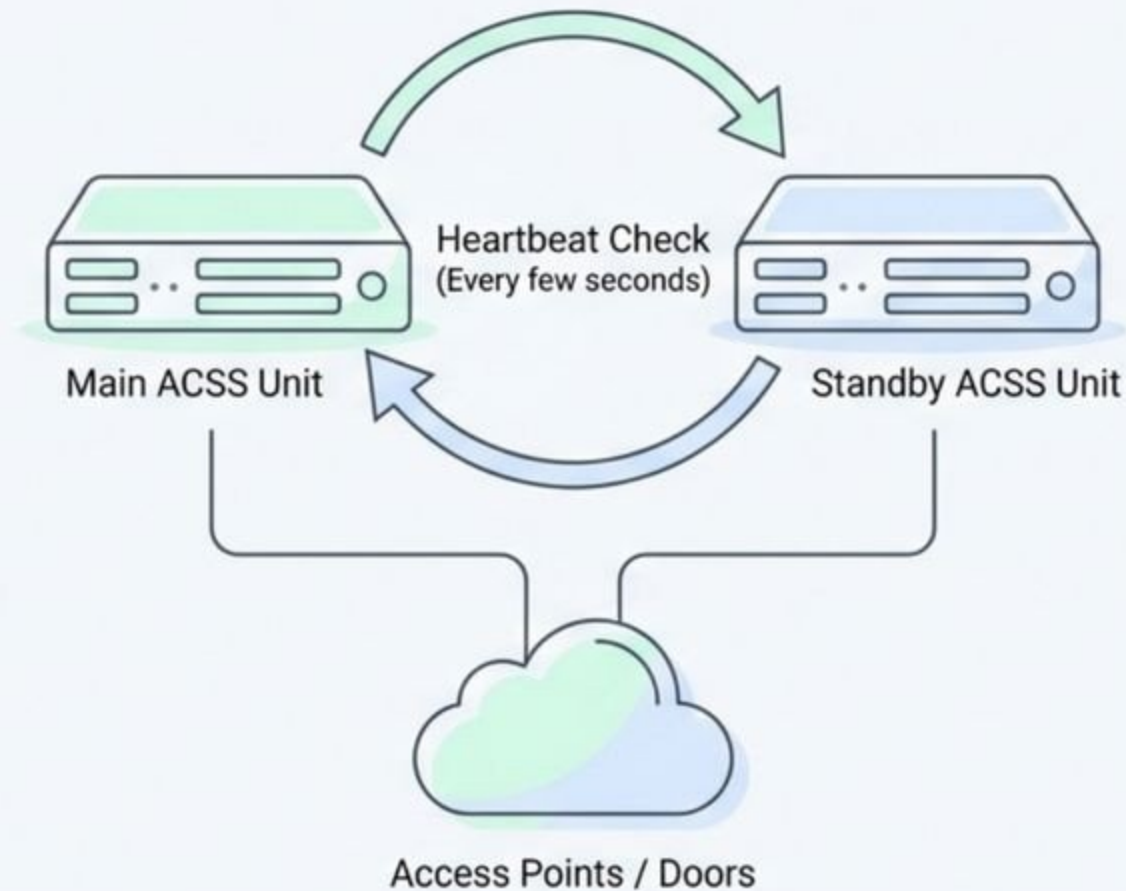

Applications

Business Focus & Vertical Markets

Application	Scope / Features	Target Audience
Access Control Management	Door, gates, locks, face ID, card, ALPR, tailgating	Employee
Attendance Management	Work shifts, clock-in, clock-out, late, absent	Employee
Visitor Management	Visitor enrollment for temporary access	Visitor
Construction Site Management	Work shifts, clock-in, clock-out, late, absent	Employee
Food Ordering Management	Conveniently manage employee services	Employee
Conference Room Management	Book available meeting rooms	Employee
Customer Arrival Management	Track when customers arrive to appointments	Customer

Solutions

Redundancy & Reliability

1. **Watch:** Standby unit monitors Main unit availability.

2. **Takeover:** If Main fails, Standby instantly controls all doors.

3. **Restore:** Data synchronizes back to Main upon recovery.

Sync: Standby periodically downloads configuration data.

Product Introduction

Product Matrix - Access Control Servers

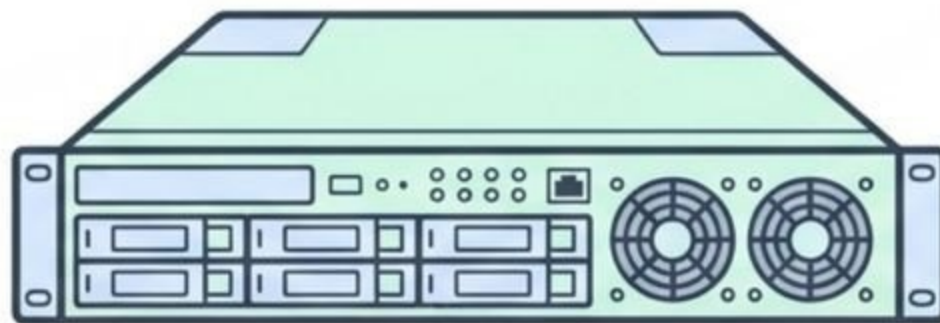

ACS-100

Standalone Server

Roboto Regular

- Compact Hardware
- Integrated Software
- Low IT Overhead

ACS-402

High-Performance Server

Roboto Regular

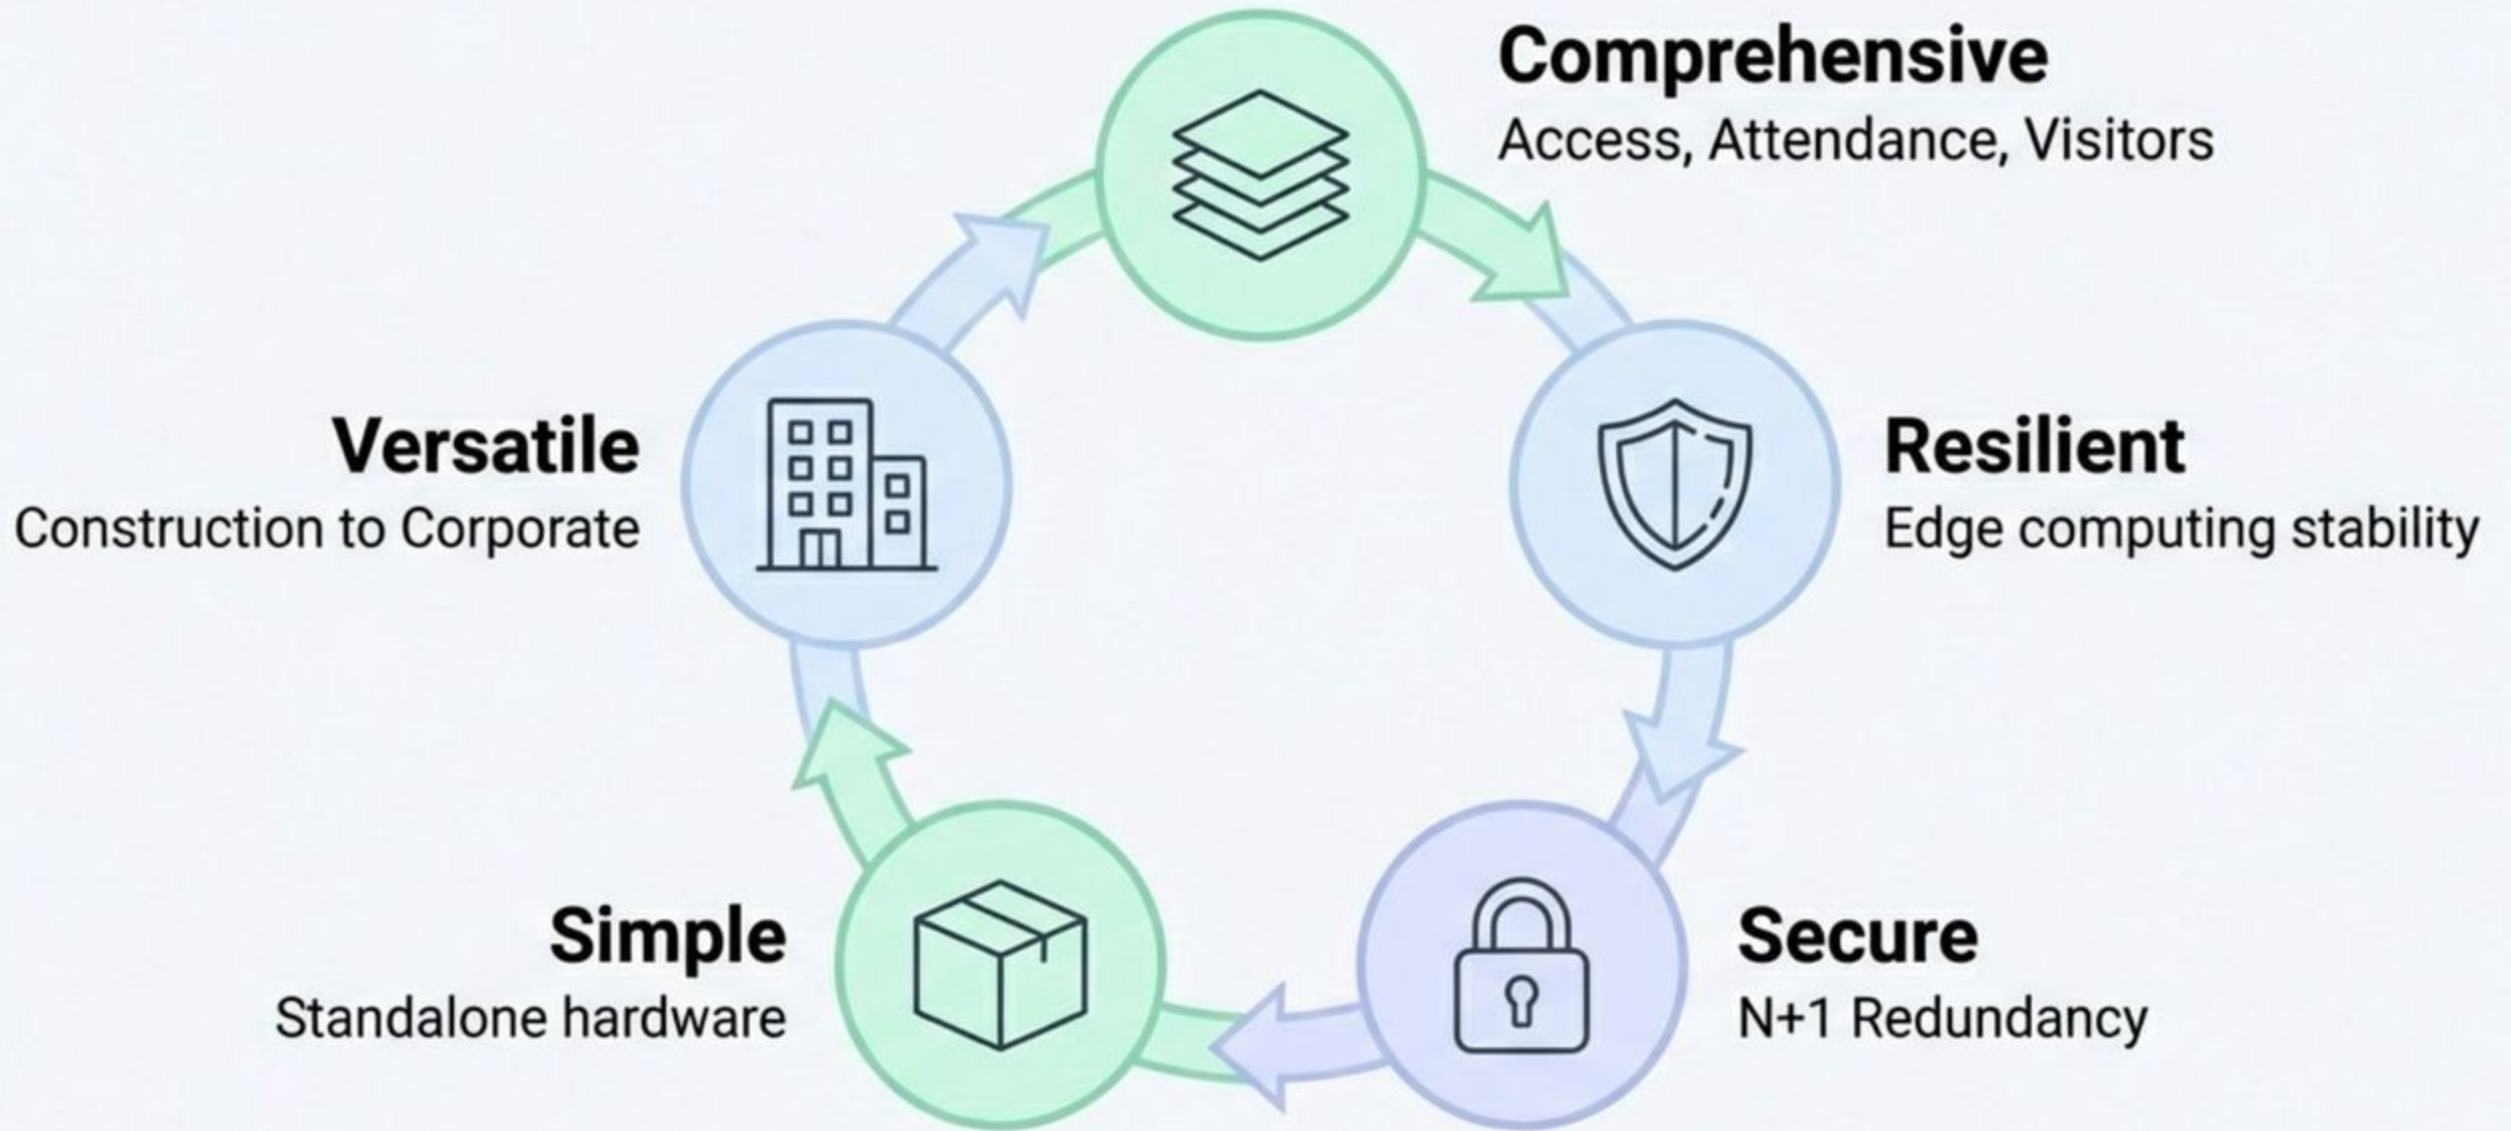

- High Capacity
- Redundancy Ready
- Rack-mountable

Product Introduction

Comparison – Standalone vs. PC-Based

ACTi Standalone Server 	Competitor Software-Based 
• Software pre-installed on dedicated hardware. • Optimized OS, no conflict with other apps. • Zero IT overhead for hardware setup.	• Requires separate PC purchase & OS install. • Vulnerable to Windows updates & security holes. • Higher Total Cost (Hardware + OS + Labor).
